

# Instructions on How to Add Selenium Jar Files

## 1. Create A New Project in Eclipse:

- Call it SeleniumClassHCA

## 2. Handle Them Files

- To download Prior Files Visit This Link:
  - <http://selenium-release.storage.googleapis.com/index.html>
- We will add the Selenium JAR

Step 2.1 Right Click on the Folder SeleniumClassHCA( if future you, Project Name)

### 2.2. Select Properties

### 2.3 JAVA Build path

### 2.4 Select the Libraries Tab

### 2.5 Select the Right Side of the Bar "Add External Jars"

## 3. 3. Find the Location of Your Selenium web driver Files

And Add in the 2 jar Files

Location:

C:\SeleniumLabs\LabEnvironment\Jars\selenium-java-2.53.1\selenium-2.53.1

## 4. Step 4. - Add in all the Libs Files in the Directory

C:\SeleniumLabs\LabEnvironment\Jars\selenium-java-2.53.1\selenium-2.53.1\libs

## 5. [Hands On Lab] Add the JAVA DOC File

An explanation/ reference guide for the different methods/functions we were going over.
